1/ Both receipts and expenditures exclude (1) refunds of receipts and (2) payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings. For prior fiscal year figures adjusted to a comparable basis, beginning with 1931, see the 1949 Annual Report of the Secretary of the Treasury, pages 360 and 361.

2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts (see "Budget Receipts and Expenditures", Table 1).

3/ To make the figures for the fiscal years 1948 and 1949 comparable with those for other years shown in this table, all transactions relating to the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150) have been consolidated with Budget expenditures, beginning with the March 1950 issue of the "Treasury Bulletin".

4/ Consists of: trust funds and accounts; special deposits (net); and sales and redemptions of securities of Government corporations, etc., in the market (net). Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1937-39).

5/ For outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts of the Treasury shown in these tables, but is excluded from the 1951 Budget document figures for "Receipts from the public".

3/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by $1,800 million for subscription to the capital of the International Monetary Fund (see footnote 1).

1/ Excludes postal savings bonds.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. For date of issue of each security, see "Market Quotations"; for tax status, see "Treasury Survey of Ownership".

3/ Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to specified dates; see "Debt Outstanding", Table 3, footnote 1.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941. Series E, F, and G have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31 and October 1945, pages A-4 and A-5.

In addition to the information on savings bonds operations which appears each month, data by denominations and dollar sales by States are published at less frequent intervals but are shown on a monthly basis.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding are included in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

* Less than $500,000.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1, and September 1949, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sale and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.
4/ United States savings bonds, Series D-1940 and 1941, E, and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

"Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from $5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Not quoted on September 29, 1950.

3/ Quoted on a yield basis; on a price basis prior to May 10, 1950, for Series B- and C-1951, and prior to August 23, 1950, for Series A-1951.

4/ Issued after September 29, 1950; for amount, see "Debt Operations", Table 3.

5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

6/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Operations", Table 1, for eligibility dates.

7/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

8/ These securities are not shown until date of issue.

9/ Not quoted since date of issue.

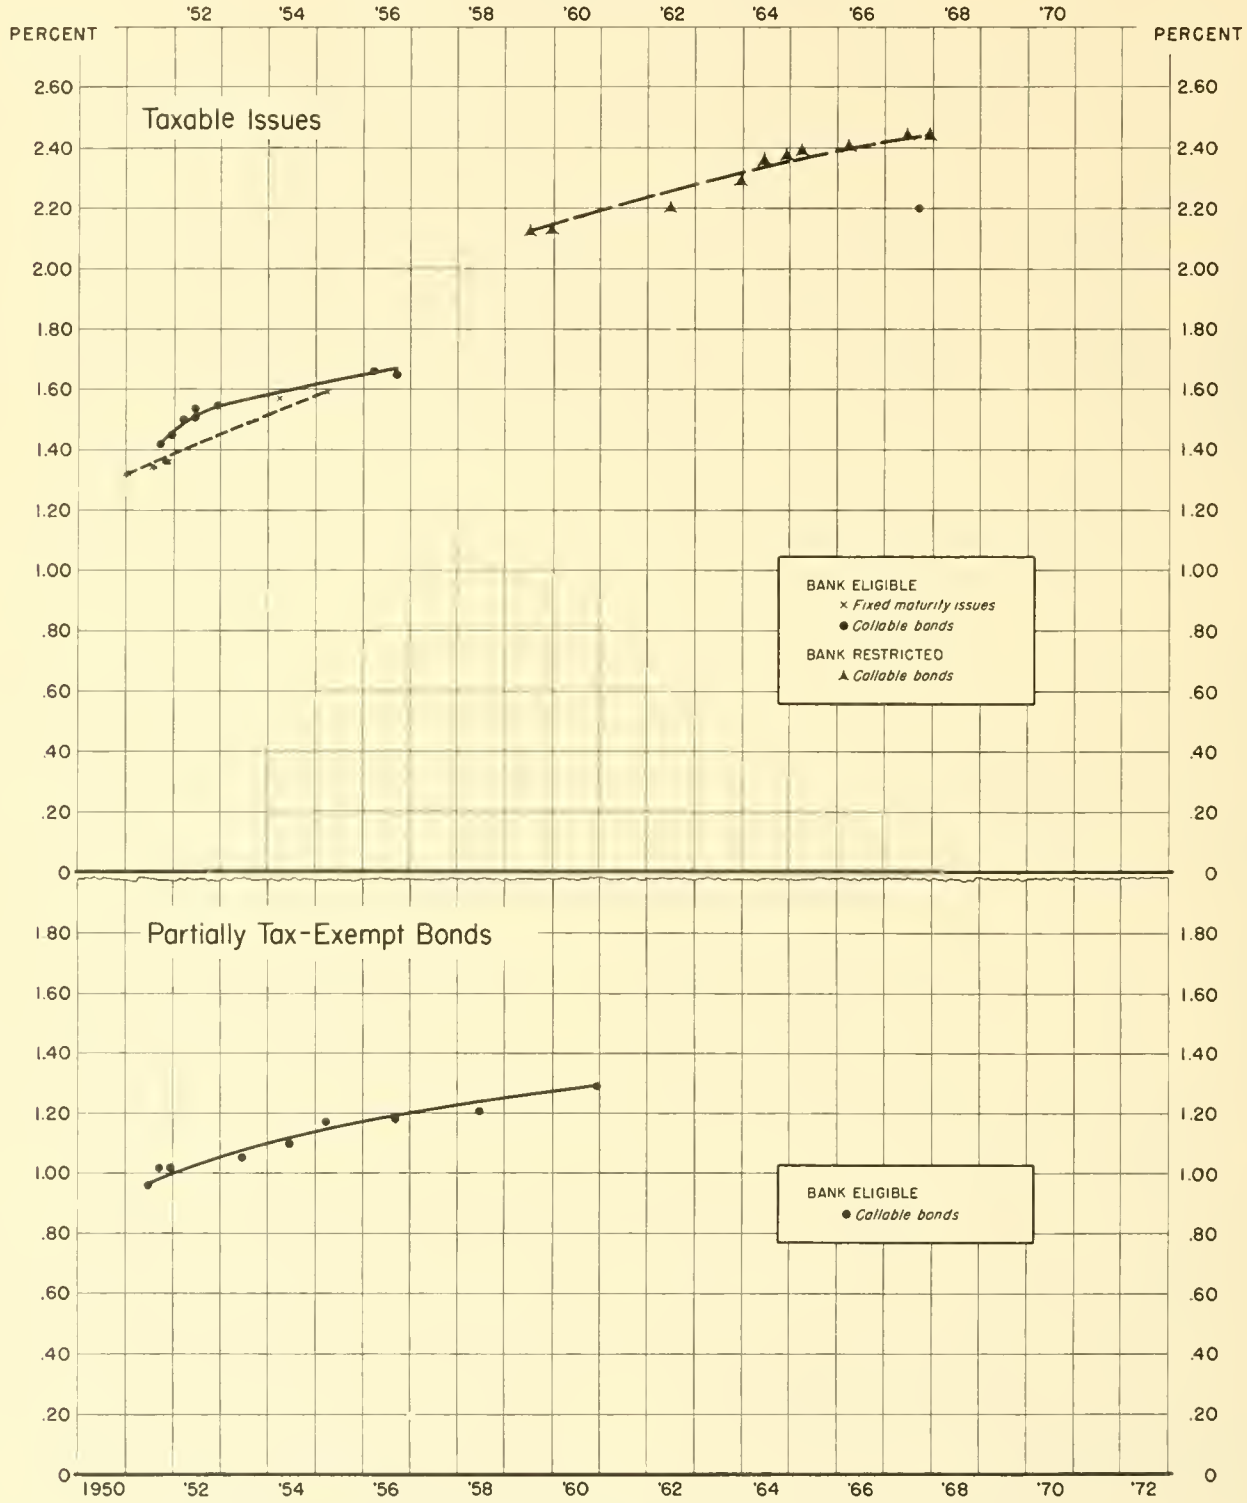
10/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

11/ Callable on 15 days' notice on November 1, 1950.

12/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

YIELDS OF TREASURY SECURITIES, SEPT. 29, 1950

Based on Mean of Closing Bid and Ask Quotations



Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Beginning December 21, 1949, the average includes nine bonds instead of ten, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4 percent bonds of 1981 having been called and exchanged for a new issue.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositaries.

1/ Excludes collections for credit to certain trust accounts for Island possessions; includes corporation income tax on Alaska Railroad.

2/ Beginning with the fiscal year 1947, collections from the unjust enrichment tax, previously carried in this column, are included with other repealed taxes under "Miscellaneous".

3/ Repealed for years ending after June 30, 1945. Beginning with July 1950, included under "Miscellaneous".

4/ Repealed taxes not shown separately are included under "Miscellaneous", beginning with figures for the fiscal year 1948.

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

Data relating to corporations in which the United States Government has a proprietary interest, direct or indirect, and to certain other business-type activities of the United States Government are presented in a series of four tables. Table 1 gives a summary of loans outstanding, Table 2, balance sheet data, Table 3, income and expense, and Table 4, source and application of funds. Tables 1 and 2 are compiled from the mid-month "Daily Treasury Statement", which contains greater detail than the summaries presented here. Tables 3 and 4 are compiled from reports of the agencies, adjusted by the Treasury Department. The latest available loan and balance sheet data are presented in this issue of the "Treasury Bulletin", and Tables 3 and 4 for the same date will appear in a subsequent issue.
